FEATURES AND BENEFITS

K-IC 70 provides an economical solution for contractors to cut costs and recycle waste material on site with low capital and operational costs, the K-IC 70 is ideal for crushing and stockpiling in diverse recycling applications including construction and demolition waste, asphalt paving, clay and concrete bricks and blocks, porcelain, ceramics, glass and other solid waste.

The compact size, ease of transport, quick set up times and intuitive operation make each of these machine ideal for contract crushers, independent rental houses and small scale operators.

- Vibrating feeder with load sensing.
- High capacity impact crusher.
- Hydraulic blockage release mechanism on crusher.
- Low fuel consumption for low cost of ownership.
- In combination with Kompatto screeners it is a small crushing plant.
- Magnetic Separator.
- Mobile Crawler unit for on-site mobility.
- Dust Suppression System.
- Best quality manufacturing, high-quality components and wear-resistant crushing hammers.
- Compact dimensions and low weight.
- Agile and easy to move on-site.
- Radio remote control.
- One-person operation.
